My understanding is that the changes under consideration to this form are designed to prevent trans people from having gender-affirming passports. This violates the injunction currently on the state by U.S. District courts in regards to the case of Zzyym v. Blinken. Second, the state is not the arbiter of gender, and has no business wasting time and taxpayer dollars on the enforcement of bigotry. I urge you to allow trans people to be able to select the gender they identify with.
