The changes to passports directed by the executive pr for "Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government" executive order should not be made. They amount to hate crimes, in addition to being completely morally untenable. The extend to which the government may have its desires to identify passport holders accurately suffer is negligent if not non-existent, whilst the harm to persons to self-actualize and self-identify, to suffer at the hands of individuals seeking discrimination against them (including the executive branch itself) is immense. These changes cannot be enacted without compromise to the duty the government holds to its people.
