Hello,

I am writing in defense of Transgender individuals in the United States. Being able to have a passport that matches their actual gender identity is a matter of safety, and making them post in favor of “biological sex” which is debatable at best is not only unconstitutional, it’s also endangering actual American lives.

The government has a duty and a right to protect ALL Americans, not just straight Cisgender and white ones. Putting our most vulnerable communities in harms way is irresponsible and reprehensible.

Do your duty, demand that this be revoked and trans Americans can be free to have a legal document that represents thier true gender here and abroad.
