I am concerned that the proposed changes would force US Passports to be issued in ways that record incorrect gender information, in flagrant violation of basic rights of individual expression, and in what would be a direct act of gratuitous discrimination against trans, non-binary and intersex Americans. Despite what executive orders may claim, even biological reality very clearly indicates that there are more than 2 sexes for human, and our passports should be capable of reflecting that reality, as well as the mutability of gender. Anything less is unamerican.
