In biology and medicine it is widely acknowledged that there are more than two sexes (intersex is a real thing) and that gender does not always correspond to sex. Forcing individuals into the boxes as defined by Trump's executive order, which do not even make sense biologically even when disregarding that at conception zygotes are all phenotypically nothing, will only cause mass confusion, particularly as biological sex at birth does not always correspond to gender. This is also in violation of *Zzyym v. Blinken*, and therefore will likely be challenge by the courts. I would highly suggest not forcing passports to align only to m or f and to not only be tied to sex at birth.
