These changes are partisan, ill thought out, and driven by an agenda with which reality does not align. In millions upon millions of people, genitals do not manifest as either a clear penis nor a clear vagina. This is known as being intersex. There are more intersex individuals in the world than there are people with red hair, and it is entirely natural from a biological perspective. The idea that genitals denote any kind of firm idea about personality or status is purely invented, and has no place in reality, let alone in legislature. Please take a rudimentary biology lesson and try again.
