DS-11 application

DS-82 passport renewal

DS-5504 name change or data corrections

In all these cases, the changes made include changes related to the "Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government" executive order, and requesting the biological sex at birth.

I believe that the extremism regarding gender identity lies within this order itself. Gender identity is a complex issue that goes beyond the physical biology of an individual. These conditions if applied would not defend women but rather limit their honest expression of self. The issue only applies to a small fraction of our population. To force these conditions upon individuals does not seem to be in keeping with individual civil liberties. I do not support these changes. I am also appalled regarding the suggestion that those convicted of sexual offenses against minors would be shielded for exposure and permitted to travel with impunity while enforcing draconian restrictions on the simple liberty to identify oneself without regard for biology at birth. Civil liberties matter.
