The changes for U.S. passports is not a wise decision. What is presented for this clearly targets transgender individuals, rendering them obsolete from the person they are today. In addition, this will not provide accurate information for who they are. Some go by different names and have looks that are completely different than what their biological sex is. This will make it problematic identifying them if you go through with calling them their birth given name and gender. I can assure you this will only end in disaster. Please stand with the people. That's what the government is supposed to do. By not doing this, you go completely against that, therefore denying what our Founding Fathers declared for our nation.
