While I'm certain my input will be discarded with millions of others, I choose to comment anyway. Trump's executive order 14168 is an extreme overreach on citizen's liberties to live and be addressed how we wish. Transgender people should have the right to present themselves however they wish so long as it's not harming someone else - and choosing a different name and wearing different clothes harms no one. It is not against the law to offend someone. Hold the specific people accountable for breaking established laws, not outright ban an entire community, who largely wants nothing more than to just live their lives peacefully. Additionally, it has been proven, scientifically, that there are more chromosomal arrangements than just XX and XY. This decision not only erases the identity of the trans community, it also erases intersex people who are BIOLOGICALLY not female nor male. They no more chose to be intersex than someone chose to be born male or female. But they are erased too, because of a psychotic narcissist in office?
