I believe anyone should be able to apply for a passport. It's another document for identification. Currently, I feel like there is a lot of confusion in our society on what to do. I think that the proposed changes are changes that will not have the intended effect, but rather the opposite. A lot of the proposed definitions are harmful and too vague to truly be definitive, and our forms need to be precise to prevent abuses and mistakes from form fillers and form officials. Please do not go forth with the proposed changes.
