I am writing against the proposals for changes for trans and non-binary individuals.

There is no meaningful national security risk to them continuing to have their gender updated properly on their passport. If anything, having the correct name and gender allows for greater accuracy of the passport.

Furthermore, this change would be discriminatory towards these individuals in their daily lives. Many of whom are just trying to get through life like every other citizen of our country.

Please note, the "only two genders" is scientifically speaking inaccurate, and all this change does is perpetuate the inaccuracy. And if someone's passport isn't accurate to who they are, then what is the point of the passport.
