Hello,

I am writing to request that you provide the option for individuals to choose the gender marker that they want on a passport application and not necessarily just go with their biological sex at birth. The Defending Women executive order incorrectly says that only "male" and "female" are immutable sexes at birth. Intersex and nonbinary individuals exist and fall outside of this rigid binary. As a trans person myself, I have yet to change my passport and would like to be able to update it to reflect my current name and gender rather than the ones I was given at birth

Thank you for your consideration.
