I sincerely hope you will reject the Trump administration's unscientific and callous request to eliminate the option for non-binary/trans individuals to mark their gender as [x]. As I'm sure you're well aware, many people, for many reasons, who do not fit comfortably into binary "male" or "female" genders. I've seen no valid reason why those individuals should not be able to identify on official documents as something other than "male" or "female". It seems unnecessary and punitive to punish our fellow Americans for identifying themselves on government-issued documents.
