I know many trans people are worried about their ability to renew/keep their passports with their appropriate gender markers, and names that reflect their gender identity. Peer reviewed science, as well as histories and cultures already the world, have shown that trans people are real and have always been with us. They are asking for respect and human dignity, and they deserve it as all people do. Please allow people to use the gender markers appropriate to them, including X for non binary/gender fluid people.
