I'm dismayed by the recent changes to make it impossible for transgender, non-binary, intersex and other people to get passports that match their gender identity and names. This is cruel, something that only exists to hurt a tiny minority simply living their lives, and of course a waste of taxpayer money to enact. Zzyym v. Blinkin already settled the X gender marker in court, as well. This needs to be undone so that the government is no longer doing harm.
