The recent changes to passport laws with regards to transgender and intersex individuals are frightening and go against both modern science and American values of freedom of expression and the pursuit of happiness. Please do not let an administration built on hate succeed in legislating groups of people out of existence. Historically, such actions are looked back on as evil, miserable regimes. We ask "how could people let this happen?" America is currently in the beginning of "letting it happen." It is the duty of the people to support every American's right to exist.
