Hi, I'm writing to advise against any proposed changes which make it difficult or impossible for trans and intersex citizens to update their passports to reflect name and gender marker changes. The point of the passport is to correctly identify people to allow for safety in travel. If we cannot update our gender and name on passports to reflect our reality, it makes travel unsafe for everyone. A accurate passport protects trans folks from violence, harassment and terror. Please don't let the politics of bigotry and exclusion affect these decisions.
