E.O. 14168 is using the false pretense "protecting" women such as myself as justification for facilitating the oppression of citizens that do not conform to erroneous belief that sex and gender are inextricably linked and rigidly binary. The "biological truth" the executive order claims to restore is not truth, but rather an outdated and harmful theory that contradicts medical fact.

These changes serve no purpose other than to cause unnecessary hardship to affected citizens. If it is really this administration's goal to protect its people, these changes should not be implemented.
