This change is coming at the demand of a president insisting on "Biological Truth" while actively silencing, censoring, and removing the work of thousands of scientists who profess the exact opposite.

The anti-trans narrative is blatantly false, and by enacting these changes the state department will be wasting taxpayer funding on an effort running against the law, the constitution, the truth of the world, and basic human decency.

If the State Department wants to keep any level of dignity, it must reject these changes.
