The changes proposed that purportedly support women are offensive to me as a woman. I am not a victim if someone is non binary or has transitioned to their true gender that is perhaps different from the one they were assigned at birth. Intersex people do exist as do non binary people and as a citizen of the US, I oppose these changes that are purely made to punish and diminish the existence of a small percentage of our population. Furthermore, gender should not be an identifying marker for any document. It's irrelevant.
