I comment strongly in favor of allowing individuals to update their passports to comport with their gender presentation. Not doing so is in violation of the injunction put on State by the U.S. District Court for the District of Colorado in the Zzyym v. Blinken case. Intersex people exist; biology is not simply xy or xx chromosomes. I suggest every member of the department of state who passes a law like this be required to submit to extensive genetic, hormonal, and physical testing to make sure all of them are exactly in line with the gender binary. If anyone is not--which statistically speaking, some of you are outside the gender binary, biologically--perhaps a foolish law like this should not exist.
