I oppose the changes related to the EO requiring gender on passports to be sex assigned at birth and only male or female. It is established science that gender is more complicated than that. Also, a person requesting to be recognized by a gender other than what was assigned at birth harms no one. There's no evidence this has been used in support of criminal activity.

When someone tells us who they are we should believe them.

This rule change is discriminatory and cruel. It should not be implemented.
