As a woman, I believe requiring a change of all passports for the sole purpose of requiring transgender individuals to use their assigned sex at birth is a major waste of time and money. The only ones who would benefit from this change are those who wish to bully transgender individuals and make their lives more difficult. This is not defending women and this is not biological truth. I do not feel any way safer by changing my passport from gender to sex, nor do I feel safer by targeting transgender individuals in what can only be described as a harassment campaign.
