The denial of passports for transgender individuals to change their birth marker is ridiculous. The United States is the leader of the free world and as such should have more freedoms than the countries we issue passports to visit, and that starts with the document itself.

Please do all you can to push back against this ridiculous agenda of the top 1% of wealth aimed at harming a gender minority of 1%. I'm begging you all to not be complacent during exceptionally trying times like the ones we live in. Do not be the hand of oppression.
