Transgender citizens of this country should not be kept from applying for a new passport. As citizens we all have the right to freedom of movement. Restricting the access of trans citizens to passports is abysmal and should be illegal. They should be allowed to apply with the gender markers they identify with, particularly if they have gone through the effort to correct their birth certificates. There should be no obstacles placed in front of trans people simply because they are trans. This is prejudice and must not be abided at the federal—or any—level.
