This is purely here to target only a minority group, it is discriminatory and it is hateful. Forcing trans individuals to identify on government documents that go against what every other government document already shows after someone has already gone through the extensive process of updating those other documents. This is targeted and discriminatory. I am a woman, I present as a woman, I live as a woman and if my passport now requires me to be identified as a male it causes confusion and makes trans people an easy target for hate and discrimination.
