Passports are meant to clearly identify and reflect the details of the person. The proposed changes contradict the meaning of a passport, which is to quickly identify and reflect the current description of the passport holder. This is equivalent to demanding baby photos be used in place of a current image for driver licenses. This proposal is dangerous and will cause undo harm unto many American citizens. A feminine framed transgender woman who has undergone full gender affirmation procedures having an M on their passport will do nothing but cause interruptions in the person lives of transgender individuals and those at security checkpoints. This causes an undo and unjust disruption for the lives of millions of American citizens, whether they are transgender, intersex, non-binary, or cisgender. The interruptions and pain caused by this proposal will not "protect" women, it will only make the lives of innocent civilians much harder in an already trying time. I plead for this proposal to not go through. Thank you.
