Just a comment regarding the decision to drop a non-M/F option from these forms. It does a great disservice to Americans of all stripes to trample on the hard-earned civil rights of even a few among us. While this change does not affect me and most likely doesn't affect my children, I want their children to feel welcome in a country that celebrates freedom.

E.O. 14168 indicates a desire to return to "ordinary and longstanding" truths about assigned sex at birth, limited to male and female. God has other plans, however, and what one person claims to be "ordinary and longstanding" does not reflect the actual scientific understanding of genetics, chromosomes, and gender expression. The variety of creation should not be forced into a false dichotomy when it's just as easy to leave a little space for people to be themselves.
