The Trump executive order banning trans people both trans men and trans women as well as intersex people from being able to have a passport that matches their identity and their outward appearance, is uniquely dangerous and capricious. It comes simply from a place of hatred and the lack of Education especially given that the American medical association has many times debunked the "fact" that there are "only two genders". This in no way makes national security safer, it in no way speeds up processing time for passports or improves any service within the Department of State. This is simply a distracting evil executive order that needs to be repealed so that trans people can have the same freedom and expectation of privacy that other US citizens enjoy.
