I find these changes to be rather cruel if I'm being honest. I have many friends who have changed their gender either from one to the other or from one to nothing. It doesn't make them unidentifiable and their Sex at Birth does not matter when it comes to determining their identity. Transgender people deserve much better than this, I don't see how in any way this protects women. It is a slippery slope to target the most at risk members of society, to expose people who are fighting every day to be who they are as well as fighting to be seen for who they really are. I am against these changes wholeheartedly.
