Hello,

It is my opinion that restricting people's ability to change and update gender markers is a restriction and infringements of constitutional rights.

"Life, Liberty, and the pursuit of Happiness" - a quote from the declaration of independence, one of the core reasons this country was created. Restricting people from updating gender to what really matches them as a person is denying them the aforementioned statement, and in my personal opinion serves no purpose than to force ideology and desires down onto people. That's exactly why we split from the brits all those years ago.

This change must be reverted in the name of freedom and liberty. Thank you.
