I strongly disagree with changing gender to sex, and with limiting the response to M or F. Intersex people across a broad spectrum make up a not insignificant number of citizens. Additionally, these changes are in violation of the injunction put on State by the U.S. District Court for the District of Colorado in the Zzyym v. Blinken case (formerly Zzyym v. Pompeo, Zzyym v. Tillerson, and Zzyym v. Kerry). Further, gender presentation is more impactful in how somebody is perceived than their assigned sex at birth, which may or may not be congruent with their perceived sex or gender as an adult. Finally, it is not the place of any government to restrict and dictate the sex or gender of any person - this overreach is a clear violation of individual self-determination and privacy, as well as overt discrimination by the federal government based on protected traits. It is contrary to science, it is contrary to established values, and it is contrary to reality.
