I am writing to oppose the language and aim of this executive order, which uses definitions of sex/gender that serve no purpose in the passport process. The president should not have the power to override personal medical choices. This is a dangerous proposal that will put many people at risk—including those who are assigned female at birth (which the order purports to support) but don't fit traditional gender presentation. This order also contradicts the states that have already enacted Real IDs, which often require physician verification or court orders and have been approved by the state.
