I am commenting about the changes to how passports are processed concerning gender. I believe as a USA Citizen, that this is unnecessary wasteful hold up and changes. I believe this is foolish distraction so that some politicians may have "made changes" and yet overall this has only caused issues, cost, strife, and furthered people's privacy concerns. I think I speak for more than just myself as a 20-30yo voter, I am not interested in politicians that waste everyones time entertaining this worry over "what if gender ideology" and no worry over those who preach this hate. Stand up for human rights. Protect our privacy. Stop these changes to our most robust ID system.
