The proposed change from "gender" to "sex" as well as restricting "sex" to only "M" or "F" based on visible characteristics at birth is a clear violation not only of accepted scientific fact but also of free speech. This is not only unconstitutional but unnecessary and making this change is a waste of taxpayer dollars.

Additionally, forcing people to carry documentation which may conflict with their appearance could inflict damage on US citizens by leaving them open to discrimination or even physical harm.
