I have numerous concerns about the proposed changes to the DS-11 form and am against the recommended changes at they currently stand.

1. Changing the label from Gender to Sex is a waste of taxpayer money as Gender is a valid and accurate term to use. Imparting this change would be solely to make a change for changes sake and this administration claims, much like they claimed the first time they were in office, that they were going to reduce waste.
2. As pointed out by multiple people, it is not accurate to claim there are only two genders as there are people born with XXX, XXY, XYY, etc chromosomes and there needs to be an official way to account for these individuals. By removing the existing options, there will be difficulties in people getting their passports.
3. Transgender people exist, and no executive order can make them disappear. Instead of throwing a tantrum and making up lies about what they want, we should allow them to live in peace without the fear of the government building multiple programs to single them out. I am not ok with us going back down the road of how we treated all Asian Americans during World War 2.
