I am against both the changes to the rules

1. We need sex offenders to be more visible, not less. We already make others aware in communities when a sex offenders moves in, why would we want them incognito, especially whern public transportation iand safety s concerned.
2. A passport is meant to represent who a person is and what gender they identify as. This rule change will only make the jobs of everyone who checks passports daily way more confusing and inefficient when working with transgender people.
