This revision is a waste of time and only further seems to set apart and make a list of people who don't fit into the current administrations idea of acceptable human beings. As a woman nothing that Trump or any other part of his administration has done so far has protected me or my family. When human beings who identify as part of the LGBTQIA+ community are allowed to live and be recognized as they present themselves they are happier, more productive and less likely to commit suicide. As the government you already have all the information anyways so why dehumanize a certain set of people in such a way other than for some sick perversion of "protecting women and girls from gender ideology".
