This has no one her basis or purpose other than hate. There are no people that this protects and only does harm. There is no law that supports transgender people losing identification. There is constitutional precedent that would not bc allow this on the basis of gender discrimination. There is also no plan on how to get these Americans a passport identification. No one in America was complaining about this or supporting it . It only affects a very very few number of Americans and there is no other motivation than to harm these people.
