This rule will forcibly out people and expose them to harassment and worse.

I assume that is the president's goal with his executive order.

It should not be the goal of any part of the government to hurt or expose the private lives of its people. It should not be the goal of any part of the US government to diminish the freedoms of its people to live as we choose. Yet this rule change will expose people to harm and limit our ability to be who we want to become.

You have the power to make changes. You can use this power for the betterment of our republic, in a small way. You can choose to be kind.

Jesus said, that which you do to the least, you do to me.

The way you treat the outcast is the way you treat God.

You make that choice every day. Make the right choice.
