The proposed changes are directly in contradiction to actual biological fact, there are far more than 2 sexes and any statement to the contrary is objectively wrong on all counts. These changes are meant to do nothing but cause harm to a minority group making up <1% of the country's population. This is a gross overreach of executive power in an effort that directly undermines the freedom and liberty of the people that the entire Executive branch is mean to be in service for. I oppose these changes wholeheartedly and any support in favor is an action made of hate and hate has no place in modern society.
