Hi there. There are more than two genders, and the recent Executive Order flies in the face of biological fact regarding this. Intersex people exist! Passports should accurately reflect the gender identity of the person applying for the passport/renewal, not defined by the government. This discriminates against transgender individuals, who are allowed equal protection under the law. Please allow people to select the gender marker that aligns with their gender identity, whether that is M, F, or X. Leaving this option in harms NO ONE.
