I do not support the proposed changes that change "gender" to "sex at birth." The EO 14168 "Defending Women from Gender Ideology Extremis and Restoring Biological Truth to the Federal Government" is a bigoted policy. It is a policy divorced from the reality of how Americans live their adult lives. Moreover, how an adult choses to express their gender and their sexuality is both not per say the same as their biological sex, nor is it the business of government. Given a passport is for identification purposes it should record how the individual presents, not what is in their underpants.
