It isn't logical to try to label someone who is trans and already so far into their transition they are medically and socially transitioned. We followed all the protocols and jumps through hoops to get qualified to take hormones do surgeries and file for name changes and legal sex changes. If I am a Trans man with a punishment peeing in a urinal like a CIS man why do you want to label me as a woman based on sexual organs I no longer even have? I don't have a vagina a uterus ovaries or boob's why should I use the women's bathroom and be labeled as a woman on my legal documents after living and transitioning already as a male?
