Please allow transgender and intersex individuals to choose their lived gender on their passports. Declaring that there are only two genders is an ideological argument, not supported by science, which shows that there is a wide range of sexual and gender expression in the human population that is not solely defined by chromosomes or genitals. Allowing this tiny segment of the population to be identified as they choose harms no one, while forcing someone to be identified wrongly on official documents is harmful to them in terms of physical safety and mental health.
