Transgender people have the right to be identified as and travel as themselves. Forcing our Passport system to only recognize Birth Gender and ignore Non-binary options is against the constitution for Life, Liberty & The Pursuit of Happiness. By implementing this change where Passports must reflect original birth certificates, not amended ones, flies in the face of science, compassion and moral behavior. Denying travel documents to our citizens is against the constitution when they have committed no crime. Forcing the passports issued federally to not match the state issued Birth Certificates creates confusion and pain.
