This change to passport rules has no actual basis in any of what it is claiming to do. The “protection of women” will only serve to further force women into hyper specific forms of femininity, particularly what is seen as ‘socially acceptable.’ Also, “restoring biological truth to the federal government” could not be further from the truth. There are countless studies of intersex and other cisgendered individuals whose bodies and genetic profiles do not fit neatly into these regressive ideals of gender. Last but not least, this is an infringement of basic human self-expression. This is a gross overreach from individuals who have no formal education on the human body.
