Hello, I'm a single mother who works full time. I don't have a lot of spare time but I am taking time to comment here because it is so important. Everyone should have access to a passport regardless of their gender identity or name change. Their passport should not have to match their sex assigned at birth. There are more than two genders, this has been proven scientifically, including intersex people, no matter our individual opinions or ideology. Opinions and ideologies should never determine whether someone has access to a passport, and it is illegal to deny a passport based on them. Thank you for taking my comment.
