This is an unnecessary change that will cost taxpayers more to implement. These new forms are in express violation of the injunction put on State by the U.S. District Court for the District of Colorado in the Zzyym v. Blinken case. They will impose a hardship on all people, perhaps numbering into the millions, whose actual genotypes do not fall neatly into the XX/XY binary -- including, among others, intersex people and those with chimaerism who don't even have one single genotype and will cause chaos and confusion for the people who already have a passport that matches their presentation.

Please seriously reconsider this and these harmful and unlawful changes.
