Hello, I am a concerned US citizen emphasizing that this incoming passport change will be an overall net negative for the people of this country, specifically trans and intersex citizens, in which this change is discriminatory against. This change will also make the work of TSA agents a great deal more difficult, as sex markers on certain passports may not visually match the passport photo or the person who themselves have the passport. The legal challenges this change will enact will also be a tremendous waste of my and many other US citizens' taxpayer dollars, and will be an unnecessary expense for the country overall. Thank you.
